

Assembled Anti Ant Stake, Tube & Sprinkler

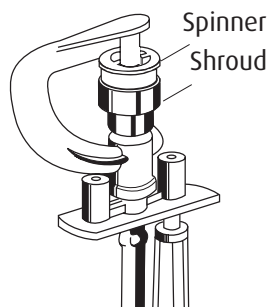

Features & Benefits

- Pre-assembled: stake, barb sprinkler and flexible tube (can be fully dismantled)
- Floating lid sprinkler prevents ants/bugs from entering sprinklers and clogging nozzle
- "C" frame design ensures optimum water coverage by minimizing dry area caused by the interference of the frame with the water discharge
- Stake height raises micro sprinkler to achieve more effective water coverage.
- High strength, rigid stake construction enables easy installation into all soil types
- Full circle coverage with a 5.3m-7.2m radius
- Manufactured from UV Stabilised materials
- Stake Length 335mm, tube length 600mm

Anti Ant Operation

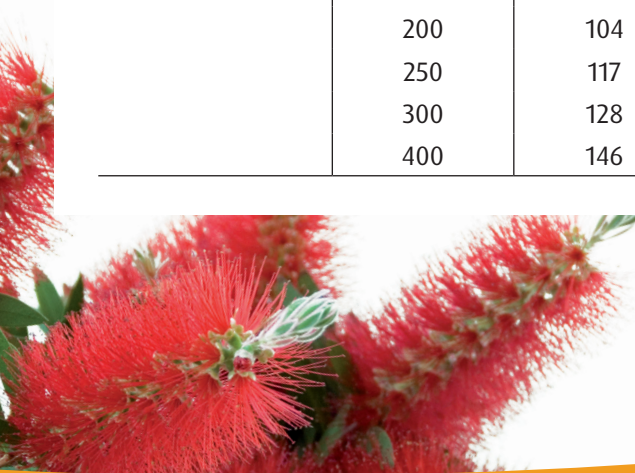

When the water is turned on, the spinner rises so that the water sprays over the top of the shroud.

When the water is turned off, the spinner drops and covers the shroud. Ants or other insects can not enter the nozzle.

Performance Data

Nozzle Colour & Size	Pressure (kPa)	Flow (Lph)	Full Circle Radius (m)
Green 1.4mm	100	74	5.3
	150	91	6.0
	200	104	6.6
	250	117	7.2
	300	128	7.2
	400	146	7.2
